This section gives basic specifications for the complete line of Vickers' screw-in proportional control valves. Its purpose is to provide a quick, convenient reference tool when choosing proportional valves or when designing a system using these components.

The **EPV10** has several outstanding performance features which give it a unique position in the screw-in cartridge valve market. Valve gain linearity, flow force pressure compensation characteristics above 20 bar (300 psi) and low internal leakage.

The **EPV16** is a proportionally controlled two-way poppet type valve. The main poppet amplifies a small flow through the pilot circuit and is comparable to a transistor. As the transistor uses small currents to control larger currents, the hydraulic valve transistor or VALVISTOR uses the pilot flow to control the main stage flow with servo-like response flow to control.

The **ESV1** is a proportional two-way, pressure compensated, poppet type flow control valve. The valve is available in 8, 10, and 12 sizes, both normally open or normally closed in the de-energized position.

The **EFV1** is a proportionally controlled two-way, spool type flow control valve. Technically the valve is not pressure compensated, but it is partial flow force pressure compensated.

The **EFV2** is a three port, pressure compensated, proportional flow control valve. The valve can be used as a priority flow regulator, with regulated flow being supplied to port 3 and excess flow being by-passed to port 2. If port 2 is blocked the valve functions as a restrictive, 2 way, pressure compensated flow regulator.

The **ERV1-10** is an electric, proportionally controlled, internally pilot operated, spool type screw-in relief valve. It is capable of handling flows from 3,8-60,0 L/min (1-15 USgpm) at pressures from 35-210 bar (500-3000 psi). Also available is an ERV1-16 which is capable of handling flows from 7,6-132 L/min. (2-35 USgpm) at pressures from 35-210 bar (100-500 psi).

The **ERV2-10** is a low flow electric proportionally controlled relief valve similar to the ERV1-10. This valve is rated for flows from 0,2-2,8 L/min (0.05-0.75 USgpm) and pressures up to 35 bar (500 psi).

The **EPRV2-8** is an electric, proportionally controlled, direct acting spool type, screw-in pressure reducing/relieving valve. It is capable of handling flows from 0-7,6 L/min (0-2 USgpm) at set pressures from 0-22 bar (0-320 psi).

The **EPRV1-10** is an electric, proportionally controlled, internally pilot operated, spool type, screw-in pressure reducing/relieving valve. It is capable of handling flows from 0-7,6 L/min (0-2 USgpm) at set pressures from 14-35 bar (200-500 psi). Also available is an **ERV1-16** which is capable of handling flows from 0-38 L/min (0-10 USgpm) at set pressures from 14-35 bar (200-500 psi).

The **EPRV3-10** is an electric, proportionally controlled, internally pilot operated, spool type, screw-in pressure reducing/relieving valve. It is capable of handling flows from 0-30 L/min (0-8 USgpm) at set pressures from 35-207 bar (500-3000 psi).

Vickers proportional pressure and flow control valves are designed to be easily controlled by the simplest of DC electrical devices such as a 12 volt battery and a potentiometer.

Varying the voltage at the coil is one of the simplest means of control available. Any of the Vickers DC coils will work on most of these valves simply by varying the voltage between 0 and 75% of the rated coil voltage. It should be noted that as the operating temperature of a coil increases, the solenoid force decreases. Therefore if the voltage is held constant as the coil heats up then valve pressure (or flow) will change.

The **IRV1** is a proportionally controlled poppet type, relief valve, with an inverse function. This valve is capable of handling flows up to 1 L/min (0.25 USgpm) and pressures up to 210 bar (3000 psi).

IRV2-10 is an inverse proportionally controlled spool type two stage relief valve. Ideal for use to control fan drive or brush pressure, where full speed or force is required under electrical failure. Valve is capable to handle flow up to 57 lpm (15 USgpm) and pressure up to 240 bar (3500 psi).

Electrical current controls with PWM are recommended for all Eaton proportional valves.

Closed-loop electrical control with feedback from the parameter to be monitored will provide the most accurate control.

Valve features and benefits

- Products in this catalog have been fatigue tested to one million cycles at 132% or 10 million cycles at 115% of rated pressure
- All operating parts are hardened steel, ground and honed for long life and low leakage
- Designed for maximum flexibility and minimal space requirements
- All exposed cartridge surfaces are zinc dichromate plated to resist corrosion
- Reliable, economical and compact
- Rated flows up to 160 L/min (42 USgpm)
- Optional nose-in, side-out or side-in, nose out flow direction (EPV16 series)

Coil features and benefits

The valves in this catalog are offered with a choice of two or three standard voltages and several types of electrical connections. For other coil ratings and connections, consult your Eaton applications engineer.

- Variety of voltages and terminations
- Coils are interchangeable for serviceability on the EPV10 and EPV16. Coils are interchangeable for serviceability on the ERV1-10, EPV1-16, EPRV1-10 and EPRV1-16
- Compact, one-piece weather-proof encapsulated design. Eliminates need for extra seals
- An arc suppression diode molded into the coil is available as a standard option on ERV, EPRV and EFV valves

Fluid cleanliness

Proper fluid condition is essential for long and satisfactory life of hydraulic components and systems. Hydraulic fluid must have the correct balance of cleanliness, materials, and additives for protection against wear of components, elevated viscosity, and inclusion of air.

Warning

Application of these products beyond published performance specifications may cause valve malfunction which may result in personal injury and/or damage to the machine.

Warning

For pressures over 210 bar (3000 psi) use steel housing.

PFR21H - Proportional valve

Proportional bi-directional poppet, flow control valve
Up to 18L/min (5 USgmp) • 210 bar (3000 psi)

B

Sectional view

Operation

In the de-energised position the valve is blocked in both directions. As the current to the coil is increased the valve opens proportionally. There is also an element of compensation as the pressure difference across the valve increases. See performance graphs.

Features

- High flow capacity with reduced space requirements.
- Standard valve bodies and common cavities.
- One-piece encapsulated coil with minimal amperage draw.
- Oil immersed armature solenoid.
- Various coil terminals and voltages.
- Coil interchangeability with valves of same series.
- Manual override, seal variations and other options available.
- Sealed coil arrangement to protect stem from corrosion.
- Reversible coil without affecting performance.

Performance data

Ratings and specifications

Performance data is typical with fluid at 32 cSt (150 SSU)

Max inlet pressure	210 bar (3000 psi)
Max regulated flow at rated current @ 50 bar	20 L/min (5.3 USgpm) @100%, 15 L/min (3.9 USgpm) @85%, 11 L/min (2.9 USgpm) @75%
Frequency	200 to 400 Hz - 200 recommended
Dead band	38-60% of rated current
Response time	80ms
Internal leakage	Up to 0.67 ml/min (10dpi) 210 bar differential at 32 centistokes
Temperature range (oil)	-30° to 120°C (-22° to 248°F)
Cavity	A6701 (see Section M)
Electrical data	See coil data sheet
Torque cartridge into cavity	30 Nm (22 lbs ft)
Mounting position	Unrestricted
Fluids	Most general purpose hydraulics fluids
Seal material	Standard nitrile with PTFE back up rings
Filtration	BS5540/4 Class 16/13 (25 micron or better)
Nominal viscosity range	15 to 250 cSt
Standard housing materials	Aluminium
Coil model code	C16-*/29
Voltage available	12, 24 VDC
Coil weight	.3 kg (.6 lbs)
Weight	.2 kg (.44 lbs)
Seal kit	SK1138 (Nitrile) SK1138V (Viton®)

Viton is a registered trademark of E.I. DuPont

Description

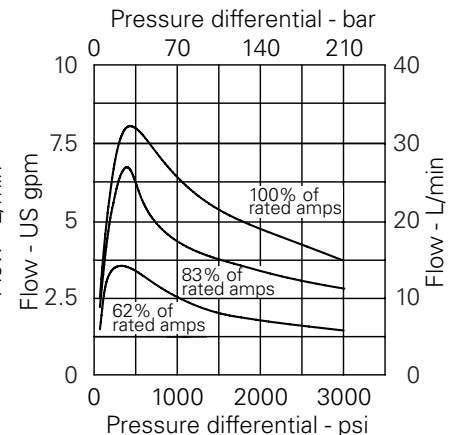

This is a proportionally operated 2 way poppet valve. Ideal for use in lowering circuits to give good control to the operator. The valve will compensate as the pressure difference increases to prevent speed increase due to increasing load.

Pressure drop

Viscosity = 32 cSt (150 SSU)

EPV10 - Proportional valve

Proportional uni-directional poppet, flow control valve
Up to 30L/min (8 USgmp) • 350 bar (5000 psi)

Operation

In the de-energized condition, blocked from port 2 to 1 with no reverse flow permitted. When energized, flow is allowed from port 2 to port 1 in direct proportion to the current applied to the solenoid coil.

Features

Hardened, ground and honed working parts to limit leakage. IP69K Tough coil compatibility. Continuously rated. Compact design with low pressure drop.

Sectional view

Performance data

Ratings and specifications

Performance data is typical with fluid at 21,8 cSt (105 SSU) and 49°C (120°F)

Typical application pressure (at port 2)	350 bar (5000 psi)
Cartridge fatigue pressure (infinite life)	350 bar (5000 psi)
Rated flow	0 - 30 L/min (0 - 8 USgpm)
Operating ambient temperature	-30° to 90°C (-22° to 194°F)
Cavity	C-10-2
Fluids	Anti-wear hydraulic oils with Buna-N seals (standard) Phosphate esters (non-alkyl) with Viton® seals are available by request Viton is a registered trademark of E.I. DuPont
Weight cartridge only	0,78 kg (1.72 lbs)
Filtration	70 - 210 bar (1000 - 3000 psi) Cleanliness code 17/15/12 210+ bar (3000+ psi) Cleanliness code 15/13/11
Standard housing materials	Aluminum or Steel
Typical hysteresis	Less than 4% of rated current at 10 bar pressure drop – Pulse Width Modulated (PWM)
Internal leakage	10 cm ³ maximum @ 140 bar (2000 psi) and oil viscosity of 30 cSt
Oil viscosity range	10 - 800 cSt
Nominal supply voltage	12 or 24 VDC
Threshold current	Adj from 300 - 600 mA (12 VDC) Adj from 150 - 300 mA (24 VDC)
Coil current @ max flow	0.7 amps max @ 24 VDC 1.4 amps max @ 12 VDC
Recommended PWM frequency	100 - 200 Hz application dependent, 150 Hz typ
Coil resistance @ 20°C (86°F)	12V-6.5Ω 24V-25.0Ω
Power consumption @ rated current and 20°C coil temperature	12V-12.8 watts 24V-12.8 watts
Cartridge seal kit	02-317580 (Buna-N)

Description

This is a uni-directional proportionally controlled, normally closed poppet valve. It is ideal for lowering circuits controlling the speed of movement with low leakage when closed.

Where measurements are critical request certified drawings. We reserve the right to change specifications without notice.

EPV10 - Proportional valve

Proportional uni-directional poppet, flow control valve
Up to 30L/min (8 USgmp) • 350 bar (5000 psi)

Model code

1 Function

EPV - Electro-proportional flow control valve, poppet type

2 Size

10 - 10 Size

3 Valve housing material

Omit for cartridge only

A - Aluminum
S - Steel

Maximum operating pressure for aluminum housing is 210 bar (3000 psi)

5 Seal material

N - Buna-N
V - Viton (standard)
NF - Buna-N and 60 mesh filter screen
VF - Viton and 60 mesh filter screen

4 Port size

Code	Port size	Housing number	
		Aluminium	Steel
0	Cartridge only		
3G	3/8" BSPP	876703	02-175103
6H	SAE 6	876700	02-175100
8H	SAE 8	876701	02-175101

See section J for housing details.

8 Coil/Connector types

Connector		12VDC	24VDC
0	No connector		
W	Leadwire (DC only)	02-361830	02-363310
Q	Spade terminals (DC only)	02-361836	02-363311
U	DIN 43650	02-361837	02-363321
Y	Metri-Pack 150 male*	02-361845	02-363322
F	Weather-Pack male	02-361848	02-364328
N	Deutsch DT04-2P	02-154124	02-391571

*Preferred Packard connector.

6 Voltage rating

12D - 12VDC
24D - 24VDC
00D - No coil

7 Manual override option

0 - No manual override
M - Pin type
S - Screw type (3mm Hex)

Manual override is available in two different configurations, either push pin type is used when system pressure does not exceed 210 bar (3000 psi). The screw type can be used at any system pressure.

9 Design number

10 - Design no.

10 Special features

Blank - None

Dimensions

mm (inch)

Cartridge only

Valve is shown with "U" coil. See Section C for coil information. Torque cartridge in housing

A - 47-54 Nm (35-40 ft. lbs)
S - 68-75 Nm (50-55 ft. lbs)

Warning

The cavity should be machined to the 14,29 (0.562) maximum diameter and 36,00 (1.417) maximum depth. See section M.

Warning

When using the "Screw Type" override, care must be taken to return the override back to its neutral position before activating the valve. Failure to take this precaution may result in personal injury or damage to the machine.

Where measurements are critical request certified drawings. We reserve the right to change specifications without notice.

EPV10 - Proportional flow control valve

Proportional uni-directional poppet, flow control valve
 Up to 30L/min (8 USgmp) • 350 bar (5000 psi)

B

Step response data

Flow vs current

With 10 bar differential between inlet and outlet

A - 210 bar (3000 psi) pressure drop from Port 2 to Port 1

B - 10 bar (150 psi) pressure drop from Port 2 to Port 1

Where measurements are critical request certified drawings. We reserve the right to change specifications without notice.

EPV10 - Proportional flow control valve

Proportional uni-directional poppet, flow control valve
Up to 30L/min (8 USgpm) • 350 bar (5000 psi)

Flow vs pressure drop

Per % of input current

Typical flow response

For an amplitude of $\pm 40\%$ maximum stroke (center to offset) about the 50% position.

$\Delta P = 10 \text{ bar (145 psi)}$

Where measurements are critical request certified drawings. We reserve the right to change specifications without notice.

EPV16 - Proportional valve

Proportional flow control, normally closed, poppet
 160L/min (42 USgpm) • 280 bar (4000 psi)

Operation

“A” style (nose in, side out) - In the de-energized position this valve remains closed from port 1 to port 2. When current is applied to the coil, a controlled increasing flow will be allowed from port 1 to port 2, in proportion to the current applied.

“B” style (side in, nose out) - in the de-energized position the valve remains closed from port 2 to port 1. When current is applied to the coil, a controlled increasing flow will be allowed from port 2 to port 1. In both examples free reverse flow is allowed in the opposite direction.

Features

Hardened and ground working parts. 280 bar working pressure, very low hysteresis, long life.

Sectional view

Description

This is a 2 way normally closed, pressure compensated, poppet type, electro proportional screw in cartridge valve with a low hysteresis and fine control. The valve is suitable for demanding applications where long life and accuracy is demanded

Performance data

Ratings and specifications

Performance data is typical with fluid at 21,8 cSt (105 SUS) and 49°C (120°F)

Typical application pressure (all ports)	280 bar (4000 psi)
Cartridge fatigue pressure (infinite life)	280 bar (4000 psi) NFPA rated
Rated flow	0 to 160 L/min (42 USgpm)

A - Aluminum
S - Steel

Note: Aluminum housings can be used for pressures up to 210 bar (3000 psi). Steel housing **must** be used for operating pressures **above** 210 bar 3000 psi).

6 Port size

Code	Port size	Housing number			
		Aluminium		Steel	
		EPV16-A	EPV16-B	EPV16-A	EPV16-B
0	Cartridge only				
4G	1/2" BSPP	02-185448	02-166607	02-180050	02-165500
6G	3/4" BSPP	02-185449	02-161592	02-180051	02-164931
10H	SAE 10	02-185450	02-170238	02-180048	02-161983
12H	SAE 12	02-185447	02-166609	02-180049	02-161982
5C	CETOP5 (NFPA D05) Interface (Requires steel body)				

See section J for housing details.

7 Seal material

N - Buna-N (standard)
V - Viton
NF - Buna-N and 60 mesh filter screen
VF - Viton and 60 mesh filter screen

8 Voltage rating

12D - 12VDC
24D - 24VDC
00D - No Coil

9 Manual override option

Blank - No manual override
0 - No manual override
M - Pin type
S - Screw type (3mm Hex)

Manual override is available in two different configurations, either push pin type is used when system pressure does not exceed 210 bar (3000 psi). The screw type can be used at any system pressure.

Note: When using the "Screw Type" override, care must be taken to return the override back to its neutral position before activating the valve. Failure to take this precaution may result in personal injury or damage to the machine.

10 Connector type

0 - No connector
F - Weatherpack male
Q - Spade Terminals (DC only)
W - Flying Lead
N - Deutsch DT04-2P
Y - Metripack 150 male*
U - DIN 43650

*Preferred Packard connector. For coil part numbers and dimensions see section C.

11 Design number

13 - Design no.

12 Special features

Blank - None

M - Pin type S - Screw type

Warning

When using the "Screw Type" override, care must be taken to return the override back to its neutral position before activating the valve. Failure to take this precaution may result in personal injury or damage to the machine.

Caution

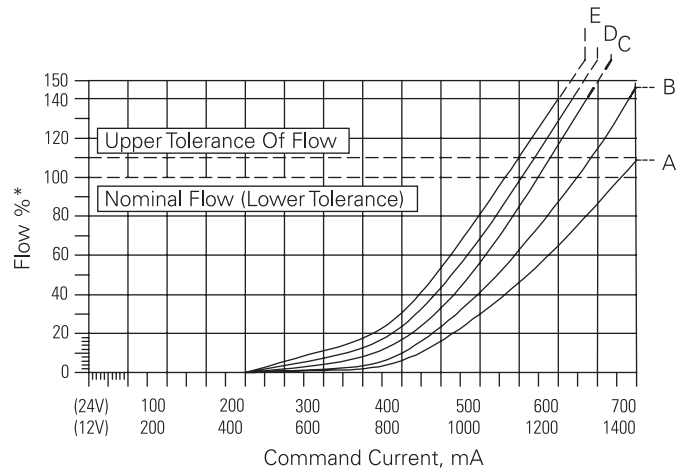

A separate check valve is required down stream to isolate the EPV valve from load forces when the EPV is used to hold a load.

Where measurements are critical request certified drawings. We reserve the right to change specifications without notice.

EPV16 - Proportional valve

Proportional flow control, normally closed, poppet
160L/min (42 USgpm) • 280 bar (4000 psi)

Pressure drop curves

* Flow interims of % for each poppet size

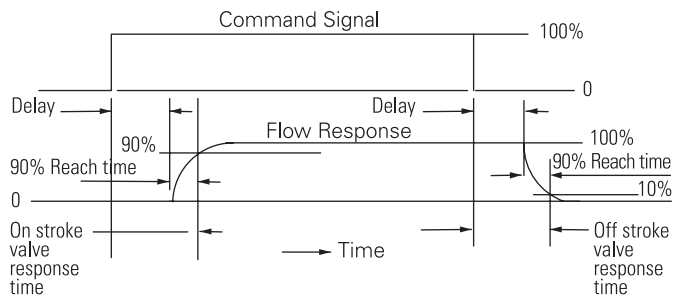

* Flow interims of % for each poppet size

Command current

	12V	24V
A-	600 mA	300mA
B-	700 mA	350mA
C-	800 mA	400mA
D-	900 mA	450mA
E-	1000 mA	500mA
F-	1100 mA	550mA
G-	1200 mA	600mA
H-	1300 mA	650mA
I-	1400 mA	700mA

Pressure differential

A-	10 bar	150 psi
B-	20 bar	300 psi
C-	50 bar	700 psi
D-	100 bar	1500 psi
E-	200 bar	3000 psi

Pressure drop @ 120 L/min (30 USgpm)

Pressure drop DP	On stroke Delay/reach 90%	Off stroke delay/reach 90%
20 bar (290 psi)	24 ms/35 ms	5 ms/15 ms
100 bar (1450 psi)	24 ms/17 ms	5 ms/7 ms

Where measurements are critical request certified drawings. We reserve the right to change specifications without notice.

Proportional flow control, normally closed, poppet
160L/min (42 USgpm) • 280 bar (4000 psi)

Dimensions

mm (inch)

Valves are shown with "U" coil. See Section C for coil information.

Torque cartridge in aluminum housing 108-122 Nm (80-90 ft. lbs)

Torque cartridge in steel housing 136-149 Nm (100-110 ft. lbs)

Cartridge only - EPV16A

Nose-in, side out

With manual actuator

No manual actuator

Note: When stand alone housings are used, the following guidelines apply:

- EPV16-A: Port 3 is to be plugged.
- EPV16-B: Port 3 is to be connected to port 1 in order to provide the required feedback flow path.

Screw type actuator (shown) 3 mm hex socket

Installation drawing (Steel)

Where measurements are critical request certified drawings. We reserve the right to change specifications without notice.

EPV16B

Proportional flow control, normally closed, poppet
 160L/min (42 USgpm) • 280 bar (4000 psi)

Dimensions

mm (inch)

For EPV16-B (flow 2 to 1), Port 3 must be connected to Port 1 externally to the cartridge, either by passages in the cavity block or external plumbing.

When purchased with undercut body, this connection is included in the body and Port 3 is not machined.

A separate external port connection is not required for EPV16-A (flow 1 to 2).

Cartridge only - EPV16B

Side-in, nose out

Required external connection with standard C-16-3S cavity.

With manual actuator

No manual actuator

Installation drawing (Steel)

Where measurements are critical request certified drawings. We reserve the right to change specifications without notice.

EPV16 - Proportional valve

Proportional flow control, normally closed, poppet
160L/min (42 USgpm) • 280 bar (4000 psi)

EPV16-A-***S-5C-***D-(*)-*-12

CETOP 5 Interface

mm (inch)

EPV16-B-***S-5C-***D-(*)-*-12

CETOP 5 Interface

mm (inch)

Note: CETOP 5 Seal Kit 02-319667.

Where measurements are critical request certified drawings. We reserve the right to change specifications without notice.

ESV1-8-C - Proportional valve

Proportional flow control, normally closed, poppet
Up to 31 L/min (8 USgpm) · 210 bar (3000 psi)

B

Operation

In the de-energized position, this valve blocks flow from port 2 to port 1 and free flow is allowed from port 1 to port 2.

In the energized position, flow from port 1 to port 2 is restricted while free flow is allowed from port 2 to port 1. The valve flow is proportional to the current applied to the coil.

Features

Hardened and ground working parts to give long life and very low leakage. IP69K Tough coil compatibility, continuously rated. Compact design with low pressure drop.

Profile view

Performance data

Ratings and specifications

Performance data is typical with fluid at 21,8 cST (105 SUS) and 49°C (120°F)

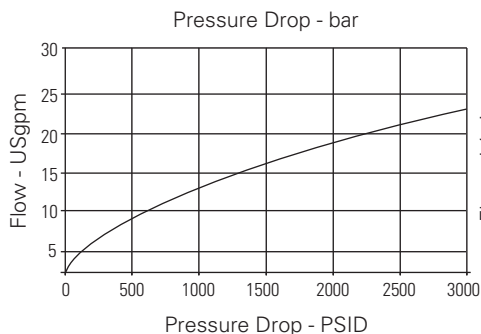

Typical application pressure	210 bar (3000 psi)
Cartridge endurance rating	1 million cycles
Cartridge fatigue pressure rating (NFPA/T2.6.1 R2-2000)	210 bar (3000 psi)
Rated flow	@ 500 psid, 8.4 gpm min, 9.3 gpm nom
Leakage (fully closed)	5 drops/min max @ 3000 psi
Nominal supply voltage	12/24 VDC
Current to open valve	1350-1450 mA (12V coil), 075-725 mA (24V coil)
Temperature range	-30° to 90°C (-22° to 194°F)
Maximum oil temperature	120°C (248°F)
Maximum internal oil temperature	200°C (392°F)
Cavity	C-8-2
Fluids	All general purpose hydraulic fluids such as: MIL-H-5606, SAE 10, SAE 20, etc.
Filtration	Cleanliness code 18/16/13
Housing material (standard)	Aluminum
Hysteresis	1 Usgpm with dither
Weight cartridge only	.11 kg (.24 lbs)
Seal kit	02-165875 (Buna-N), 02-165877 (Viton®)

Viton is a registered trademark of E.I. DuPont

Description

This is a 2 way 2 position, pilot operated poppet type, normally closed, proportional flow control screw in cartridge valve. Ideal for lowering circuits or in conjunction with pressure compensators to provide proportional flow control to any actuator.

Pressure drop curves

Where measurements are critical request certified drawings. We reserve the right to change specifications without notice.

Cartridge fatigue pressure rating (NFPA/T2.6.1 R2-2000)	210 bar (3000 psi)
Rated flow	@ 500 psid, 27.3 gpm min, 28.9 gpm nom
Leakage (fully closed)	5 drops/min max @ 3000 psi
Nominal supply voltage	12/24 VDC
Current to fully close valve	800-900 mA (12V coil), 400-450 mA (24V coil)
Temperature range	-30° to 90°C (-22° to 194°F)
Maximum oil temperature	120°C (248°F)
Maximum internal oil temperature	200°C (392°F)
Cavity	C-12-2
Fluids	All general purpose hydraulic fluids such as: MIL-H-5606, SAE 10, SAE 20, etc.
Filtration	Cleanliness code 18/16/13
Housing material (standard)	Aluminum
Hysteresis	1 USgpm with dither
Weight cartridge only	.10 kg (.23 lbs)
Seal kit	02-165889 (Buna-N), 02-165888 (Viton®)

Viton is a registered trademark of E.I. DuPont

Description

This is a 2 way 2 position, pilot operated poppet type, normally open, proportional flow control screw in cartridge valve. Ideal for lowering circuits or in conjunction with pressure compensators to provide proportional flow control to any actuator.

EFV1-10-C - Proportional valve

Proportional flow, normally open, poppet
Up to 38 L/min (10 USgpm) • 210 bar (3000 psi)

Profile view

Description

This is a 2 way 2 position, pilot operated spool type, normally closed, proportional flow control screw in cartridge valve. Ideal for speed control and in conjunction with pressure compensators to provide proportional pressure compensated flow control to any actuator.

Operation

The valve is controlled by current supplied to the coil. At zero current, the valve is fully closed from port 3 to port 2. At 1500 mA (12V coil) the valve is considered fully open. This is the maximum intended current level for use in applications. Port 1 is used for pressure balancing the spool and armature and must be blocked in all cases. The maximum intended pressure drop is 300 PSID. At pressure drops above 300 PSID, almost no increase in flow is obtained. The intended flow direction is from port 3 to port 2.

Operation of the valve with flow from port 2 to port 3 will produce flow vs current and flow vs pressure drop curves that are significantly different from those obtained with flow from port 3 to port 2. Since the spool and armature are pressure balanced, the operating pressure does not affect the operating characteristics of the valve. The operating point of the valve is determined only by current, pressure drop and temperature.

Features

Hardened and ground working parts to give long life with good control; Compact design with low pressure drop. IP69K Tough coil compatibility, continuously rated.

Performance data

Ratings and specifications

Performance data is typical with fluid at 21,8 cST (105 SUS) and 49°C (120°F)

Typical application pressure	210 bar (3000 psi)
Cartridge endurance rating	1million cycles
Cartridge fatigue pressure (infinite life)	210 bar (3000 psi) NFPA rated
Rated flow	Flow rating "A" 15.1 L/min (4 USgpm) Flow rating "B" 30.2 L/min (8 USgpm) Flow rating "C" 37.9 L/min (10 USgpm)
Internal leakage	197 cm ³ /min (12in ³ /min) @ 3000 PSID
Nominal supply voltage	12/24 V
Current to fully close valve	1500-1600 mA (12V coil), 750-800 mA (24V coil)
Recommended PWM frequency	200-400 Hz
Coil resistance	4.7v V/12V, 19.0V/24V
Mass	Cartridge only 0,37 kg (0.82 lb), cartridge with coil and end nut 0,73 kg (1.62 lb)
Temperature range	-30° to 90°C (-22° to 194°F)
Maximum oil temperature	120°C (248°F)
Maximum internal coil temperature	200°C (392°F)

 Up to 11 L/min (2.9 USgpm) • Up to 250 bar (3600 psi)

Operation

In the de-energized (center) position, all ports are blocked. When solenoid A is energized, flow is directed from port 3 to port 2 and from port 4 to port 1. Port 1 is not intended to be used as an inlet.

When solenoid B is energized, flow is directed from port 3 to port 4 and from port 2 to port 1. Port 1 is not intended to be used as an inlet.

Features

- Highly engineered components
- Compact design with low pressure drop
- Designed for optimized linearity and hysteresis
- IP69K ToughCoils™ compatible
- Optional manual override
- Industry standard cavity tool

Ratings and specifications

Performance data is typical with fluid at 21,8 cST (105 SUS) and 49°C (120°F)

Typical application pressure	
Operating Pressure Port 1 (T)	210 bar (3,000 psi)
Operating Pressure Port 2,3 and 4 (A, P and B)	250 bar (3,600 psi)
Cartridge fatigue pressure (infinite life)	
Port 1 (T)	210 bar (3,000 psi)
Port 2,3 and 4 (A, P and B)	250 bar (3,600 psi)
Rated burst pressure	750 bar (10,600 psi) per NFPA/T2-6-1 R2-2000
Rated flow	11.0 L/min (2.9 USgpm)
Temperature range	-40° to 120°C (-40° to 248°F)
Coil power	23 W*
Maximum hysteresis	7.0%
Step response	70 ms to 90% flow
Cavity	C-8-4
Fluids	All general purpose hydraulic fluids such as: MIL-H-5606, SAE 10, SAE 20 etc.
Filtration	Cleanliness code 18/16/13
Standard housing material	Steel
Weight including coils	0.5 kg (1.1 lbs)
Seal kit	02-160757 (Buna-N), 02-160758 (Viton®)
Internal leakage	165 cm³/min (10 in³/min) max. @ 210 bar (3000 psi)

Viton is a registered trademark of E.I. DuPont.

*AC coils must be used with a rectifying connector.

Description

The ESV9 with E spool is a proportional four-way, three-position, direct acting, spool type solenoid valve with all ports closed in the de-energized position. This valve is ideal for moderate flow applications where an actuator needs to be controlled proportionally in both directions and stopped in any position.

Pressure drop

A - Port 3 to port 2
B - Port 3 to port 4

C - Port 4 to port 1
D - Port 2 to port 1

Flow vs. Current at 10 bar ΔP

Where measurements are critical request certified drawings. We reserve the right to change specifications without notice.

ESV9-8-F - Proportional solenoid valve

4-way, 3-position, screw-in cartridge, proportional solenoid valve
Up to 11 L/min (2.9 USgpm) • Up to 250 bar (3600 psi)

Operation

In the de-energized (center) position, port 1, port 2, and port 4 are open to each other while port 3 is blocked. When solenoid A is energized, flow is directed from port 3 to port 2 and from port 4 to port 1. When solenoid B is energized, flow is directed from port 3 to port 4 and from port 2 to port 1.

Features

- Highly engineered components
- Compact design with low pressure drop
- Designed for optimized linearity and hysteresis

- IP69K ToughCoils™ compatible
- Optional manual override
- Industry standard cavity tool.

Warning

Maintain 5-8 Nm (4-6 ft lbs) maximum torque on valve tube nut. Over tightening may cause valve failure.

Where measurements are critical request certified drawings. We reserve the right to change specifications without notice.

PFR24A - Proportional valve

Proportional bi-directional, normally closed poppet
18 L/min at 75% • 210 bar (3000 psi)

Sectional view

Operation

In the de-energized condition the valve is closed. As current is applied to the coil the valve opens proportionally allowing flow from port 2 to port 1.

Features

- High flow capacity with reduced space requirements.
- Standard valve bodies and common cavities.
- One-piece encapsulated coil with minimal amperage draw.
- Oil immersed armature solenoid.
- Various coil terminals and voltages.
- Coil interchangeability with valves of same series.
- Manual override, seal variations and other options available.
- Sealed coil arrangement to protect stem from corrosion.
- Reversible coil without affecting performance.

Performance data

Ratings and specifications

Performance data is typical with fluid at 32 cST (150 SUS)

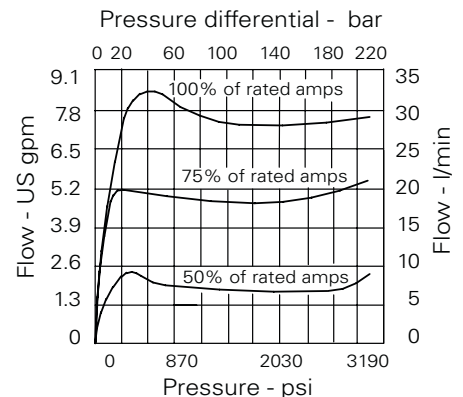

Max inlet pressure	210 bar (3000 psi)
Rated flow	28 L/min @ 100%, 23 L/min @ 85%, 18 L/min @ 75%
Hysteresis	8% maximum without PWM, 4% maximum with PWM
Frequency	200 Hz to 400 Hz - 200 recommended
Dead band	25-35% of rated current
Response time	300 ms
Internal leakage	Up to 200 ml/min, 210 bar differential
Temperature range	-30° to 120°C (-22° to 248°F)
Cavity	A6701 (see section M)
Electrical data	See coil data sheet
Torque cartridge into cavity	30 Nm (22 lbs ft)
Mounting position	Unrestricted
Fluids	All general purpose hydraulics fluids such as: MIL-H-5606, SAE 10, SAE 20, etc
Seal Material	Standard nitrile with PTFE back up rings
Filtration	BS5540/4 Class 16/13 (25 micron or better)
Nominal viscosity range	15 to 250 cSt
Standard housing materials	Aluminium alloy
Coil Weight	0.3 kg (.6 lbs)
Weight	0.2 kg (.44 lbs)
Seal kit	SK1138 (Nitrile) SK1138V (Viton®)

Viton is a registered trademark of E.I. DuPont

Description

This is a compact 2 ported proportional, pressure compensated, spool type flow regulator. Ideal for speed regulation of actuators in many applications.

EFV2-12-C - Proportional valve

Proportional flow, normally closed spool
Up to 114 L/min (30 USgpm) • 210 bar (3000 psi)

Sectional view

Description

This is a three port pressure compensated proportional normally closed flow control screw in cartridge valve. The valve can be used as a priority or a restrictive style valve allowing the valve to control the outlet flow with the option of the excess flow being used for another system.

Operation

Current supplied to the coil controls the valve. At zero current, the valve is fully closed from port 1 to port 3. At 1500 to 1600 mA (12V coil) the valve is fully open.

The valve will regulate flow out of port 3 regardless of downstream system pressure. As current is increased to the solenoid the flow out of port 3 will increase.

Features

Hardened and ground working parts to give long life with good control; Compact design with low pressure drop. IP69K Tough coil compatibility, continuously rated.

Performance data

Ratings and specifications

Performance data is typical with fluid at 21,8 cST (105 SUS) and 49°C (120°F)

Typical application pressure	210 bar (3000 psi)
Cartridge endurance rating	1 million cycles
Cartridge fatigue pressure (infinite life)	210 bar (3000 psi) NFPA rated
Rated flow	<p>"A" Spool-max regulated flow (by-pass mode): 57 L/min (15 USgpm) max regulated flow (2 port mode): 53 L/min (14 USgpm) max input flow (input flow): 114 L/min (30 USgpm)</p> <p>"B" Spool-max regulated flow (by-pass mode): 38 L/min (10 USgpm) max regulated flow (2 port mode): 31 L/min (8 USgpm) max input flow (input flow): 114 L/min (30 USgpm)</p> <p>Note: Max regulated flow may decrease slightly during compensation.</p>
Internal leakage (fully closed)	240 cm ³ /min (15 in ³ /min) @ 3000 PSID
Nominal supply voltage	12/24 V
Current to fully open valve	1600 ± 200 mA (12V coil), 800 ± 100 mA (24V coil)
Current to fully close valve	350 ± 100 mA (12V coil), 175 ± 50 mA (24V coil)
Recommended PWM frequency	200-400 Hz
Coil resistance	4.7v V/12V, 19.0 V/24V
Mass	Cartridge only 0,37 kg (0.82 lb), cartridge with coil and end nut 0,73 kg (1.62 lb)

EFV2-12-O - Proportional valve

Proportional flow, normally open spool
Up to 114 L/min (30 USgpm) • 210 bar (3000 psi)

Profile view

Description

This is a three port pressure compensated normally open proportional flow control screw in cartridge valve. The valve can be used as a priority or a restrictive style valve allowing the valve to control the outlet flow with the option of the excess flow being used for another system.

Operation

Current supplied to the coil controls the valve. At zero current, the valve is fully open from port 1 to port 3. At 1600 mA (12V coil) the valve is fully closed.

The valve will regulate flow out of port 3 regardless of downstream system pressure. As current is increased to the solenoid the flow out of port 3 will decrease.

Features

Hardened and ground working parts to give long life with good control; Compact design with low pressure drop. IP69K Tough coil compatibility, continuously rated.

Performance data

Ratings and specifications

Performance data is typical with fluid at 21,8 cST (105 SUS) and 49°C (120°F)

Typical application pressure	210 bar (3000 psi)
Cartridge endurance rating	1million cycles
Cartridge fatigue pressure (infinite life)	210 bar (3000 psi) NFPA rated
Rated flow	<p>"A" Spool-max regulated flow (by-pass mode): 53 L/min (14 USgpm) max regulated flow (2 port mode): 42 L/min (11 USgpm) max input flow (input flow): 114 L/min (30 USgpm)</p> <p>"B" Spool-max regulated flow (by-pass mode): 38 L/min (10 USgpm) max regulated flow (2 port mode): 31 L/min (8 USgpm) max input flow (input flow): 114 L/min (30 USgpm)</p> <p>Note: Max regulated flow may decrease slightly during compensation.</p>
Internal leakage (fully closed)	77-483 cm ³ /min (5-30 in ³ /min) @ 3000 PSID
Nominal supply voltage	12/24 V
Current to fully open valve	350 6 100 mA (12V coil), 800 6 100 mA (24V coil)
Current to fully close valve	1600 6 200 mA (12V coil), 800 6 100 mA (24V coil)
Recommended PWM frequency	200-400 Hz
Coil resistance	4.7v V/12V, 19.0 V/24V
Mass	Cartridge only 0,37 kg (0.82 lb), cartridge with coil and end nut 0,73 kg (1.62 lb)
Temperature range	-30° to 90°C (-22° to 194°F)
Maximum oil temperature	120°C (248°F)
Maximum internal coil temperature	200°C (392°F)
Cavity	C-12-3
Fluids	All general purpose hydraulics fluids such as: MIL-H-5606, SAE 10, SAE 20, DTE 24, etc.
Filtration	Cleanliness code 18/16/13
Housing material (standard)	Aluminum or steel
Hysteresis	1.5 USgpm with 400Hz PWM driver
Seal kit	9900171-000 (Buna-N), 9900172-000 (Viton®)

Viton is a registered trademark of E.I. DuPont.

PDR21A - Proportional valve

Proportional relief
1.5 L/min (.3 USgpm) • 350 bar (5000 psi)

Operation

The poppet is held on the seat by a light spring. The force is increased by the application of magnetic force due to the increase in current. This increases the pressure required to lift the poppet of the seat thus controlling the pressure.

Features

- High flow capacity with reduced space requirements.
- No dynamic seals.
- Standard valve bodies and common cavities.
- One-piece encapsulated coil with minimal amperage draw.
- Oil immersed armature solenoid.
- Various coil terminals and voltages.
- Coil interchangeability with valves of same series.
- Manual override, seal variations and other options available.
- Sealed coil arrangement to protect stem from corrosion

Sectional view

Performance data

Ratings and specifications

Performance data is typical with fluid at 21,8 cST (105 SUS) and 49°C (120°F)

Max inlet pressure	350 bar (5000 psi)
Pressure range	10 = 5-107 bar (72-1550 psi), 20 = 14-220 bar (200-3200 psi), 35 = 22-350 bar (320-5000 psi)
Max press port 2	100 bar (1450 psi)
Max flow	1.5 L/min (.3 US GPM)
Hysteresis	<12.5% without PWM
Dead band	10% approx
Response time	10 = 2-193 ms, 20 = 3-395 ms, 35 = 2-358 ms
Internal leakage	<5 ml/min
Temperature range	-30° to 120°C (-22° to 248°F)
Cavity	A879 (see Section M)
Electrical data	See coil data sheet
Torque cartridge into cavity	40 Nm (29.5 lbs ft)
Mounting position	For best results mount below reservoir oil level. If this is not feasible mount horizontally
Fluids	All general purpose hydraulics fluids such as: MIL-H-5606, SAE 10, SAE 20, etc
Seal material	Standard nitrile with PTFE back up rings
Filtration	BS5540/4 Class 18/13 (25 micron or better)
Nominal viscosity range	15 to 250 cSt
Standard housing materials	Aluminium
Coil Model Code	C16-*/*/19
Coil Weight	.3 kg (.6 lbs)
Weight	.25 kg (.55 lbs)
Voltage available	12/24 VDC
Seal kit	SK1119 (Nitrile) SK1119V (Viton®)

Viton is a registered trademark of E.I. DuPont

Description

This is a proportional poppet style pilot relief cartridge. The pressure setting is directly proportional to changes in DC current input. The valve is ideal for the control of larger valves for the control of a pressure within a system.

Performance curves

Where measurements are critical request certified drawings. We reserve the right to change specifications without notice.

IRV1-10 - Proportional valve

Proportional inverse relief, poppet
1 L/min (.25 USgpm) • 210 bar (3000 psi)

Operation

The IRV1-10 proportional relief is spring biased closed to the highest setting. Increasing current to the coil will proportionally decrease the pressure setting.

When the pressure at port 1 (inlet) is enough to overcome the spring force, the poppet lifts and allows flow from port 1 to port 2 (outlet).

Features

Hardened and ground components for accurate consistent control and a long life. IP69K Tough coil compatibility continuously rated.

Only required if valve has special features, omitted if "00."

Dimensions
mm (inch) Torque cartridge in aluminum housing 108-122 Nm (80-90 ft lbs).

Cartridge only

Installation drawing

Warning
Maintain 5-8 Nm (4-6 ft lbs) maximum torque on valve tube nut. Over tightening may cause valve failure.

Where measurements are critical request certified drawings. We reserve the right to change specifications without notice.

PPD22A - Proportional valve

Proportional reducing/relief, spool
20 L/min (5.4 USgpm) • 210 bar (3000 psi)

Sectional view

Description

This is a low pressure proportional direct acting pressure reducing valve with a reverse relief screw in cartridge valve. It is ideal for the control of compensators on a pump or brake and clutch systems on a transmission circuit.

Operation

In the de-energized position, pressure inlet port 2 is open to reduced pressure port 1, return port 3 is closed. As electrical current is increased, the setting of the valve increases allowing pressure at port 1 to increase. If the pressure at port 1 exceeds the setting of the valve, the spool will shift further and relieve to port 3.

Features

- High flow capacity with reduced space requirements.
- No dynamic seals.
- Standard valve bodies and common cavities.
- One-piece encapsulated coil with minimal amperage draw.
- Oil immersed armature solenoid.
- Various coil terminals and voltages.
- Coil interchangeability with valves of same series.
- Manual override, seal variations and other options available.
- Sealed coil arrangement to protect stem from corrosion.

Performance data

Ratings and specifications

Performance data is typical with fluid at 32 cSt (150 SUS)

Max inlet pressure	210 bar (3000 psi)
Max regulated pressure	19 watt coil 24 bar, 29 watt coil 28 bar
Max flow	18.6 L/min (5 USgpm) 19 watt coil 20 L/min (5.4 USgpm) 29 watt coil
Hysteresis	16% max without PWM
Frequency	200 Hz
Dead band	19% approx
Response time	10 = 2-193 ms, 20 = 3-395 ms, 35 = 2-358 ms
Internal leakage	Up to 50 mL/min at 210 bar differential
Temperature range	-30° to 120°C (-22° to 248°F)
Cavity	A3531 (see Section M)
Torque cartridge into cavity	30 Nm (22 lbs ft)
Mounting position	Unrestricted
Fluids	All general purpose hydraulics fluids such as: MIL-H-5606, SAE 10, SAE 20, etc
Seal material	Standard nitrile with PTFE back up rings
Filtration	BS5540/4 Class 18/13 (25 micron or better)
Nominal viscosity range	15 to 250 cSt
Standard housing materials	Aluminium
Coil weight	.3 kg (.6 lbs)
Weight cartridge only	.25 kg (.55 lbs)
Seal kit	SK1119 (Nitrile) SK1119V (Viton®)
Coil part number	C16*-/19 (PPD21A) C16*-/29 (PPD21H)
Voltage available	12, 24 VDC

Viton is a registered trademark of E.I. DuPont

Cartridge only
Valve is shown with "N" coil.

Installation drawing

Warning
Maintain 5-8 Nm (4-6 ft lbs) maximum torque on valve tube nut. Over tightening may cause valve failure.

EPPV5 - Proportional Valve

Proportional pressure reducing valve
8.0 L/min (2.1 USgpm) • 50 bar (725 psi)

Profile view

Operation

In the de-energized position, pressure inlet port 2 is closed and reduced pressure port 1 is open to return port 3. As electrical current is increased, port 2 opens to port 1 and port 3 closes, proportionally increasing pressure at port 1.

If the pressure at port 1 exceeds the setting of the valve, the spool will shift further and relieve to port 3.

Features

- Compact design allows for more flexible machine design

- Excellent repeatability, hysteresis and resolution due to bearing design
- Quality standard reduces maintenance and downtime costs

Performance data

Ratings and Specifications

Performance data is typical with fluid at 21,8 cST (105 SUS) and 49°C (120°F)

Maximum inlet pressure, A(1) and P(2)	50 bar (725 psi)
Maximum inlet pressure, Tank (3)	30 bar (425 psi)
Reduced pressure range	In accordance with control pressure range in model code
Maximum operating flow	8.0 L/min (2 USgpm)
Temperature range	-40° to 105°C (-40° to 221°F)
Cavity	TC06025
Fluids	Mineral oil according to DIN 51524
Filtration	Cleanliness code 20/18/15
Recommended PWM frequency	100 Hz
Hysteresis @100 Hz PWM	<0.7 bar (pA = 20) <1.0 bar (pA = 25) <1.5 bar (pA = 35)
Resistance	4.72 ohms +/-5% for 12V 20.8 ohms +/-5% for 24V
Current	1500 mA for 12V 750 mA for 24V
Protection class	Up to IP6K6 / IPX9K

EPRV1-10 - Proportional valve

Proportional reducing/relief, spool
7.6 L/min (2 USgpm) • 35 bar (500 psi)

Description

The EPRV1-10 is an electric, proportionally controlled, internally pilot operated, spool type, screw-in relief valve.

Operation

This valve remains open from port 2 to port 1 (port 3 must be vented). Once the predetermined pressure is reached

at port 1, the spool shifts to restrict the inlet flow at port 2, which regulates the pressure at port 1.

If the pressure at port 1 exceeds the setting of the valve, the spool will shift farther and relieve to port 3.

Maintain 5-8 Nm (4-6 ft lbs) maximum torque on valve tube nut. Over tightening may cause valve failure.

For hydropower, it's...

Durability.

Complete plant control systems for gate operation, turbine governors and balance of plant... including total hydraulic control systems, entire power distribution and control systems, coolant, lubrication and filtration systems. All with the most respected brand name products in the industry, manufactured and warranted by Eaton under a single purchase order.

For wind energy, it's...

Reliability.

Eaton's integrated systems help harvest the inexhaustible green power of wind. In constant use under the harshest conditions, wind turbines demand extreme reliability and durability from every component. Eaton is a world leading manufacturer of those critical hydraulic, electrical and filtration products.

For everyone, it's...

Sustainability.

Eaton seeks out and tests the latest environmentally acceptable and biodegradable hydraulic fluids...from all over the world. By leading the way for our customers and their industries, we are working to sustain and safeguard the environment, everywhere our products are at work.
